

Rail Terminal Connector Information

Rteck Pacific uses a combination of different suppliers to give our customers a choice of quality and price with rail connector product combinations.

These include

- Weidmuller – Rteck code W = AKZ4 Rail Rteck code I = AKZ1.5 Rail
- Phoenix – Rteck code P
- Elmex – Rteck code E added, medium quality specifications at lower costs.

SPECIAL NOTE:

Push in terminals can be provided and fitted on request (via your wholesaler)

Rteck Weidmuller options are the TS15 series micro terminals type AKZ –

see descriptions below:

Rteck's Phoenix option includes their micro rail MBK terminals specifically 6mm

Rteck's Elmex option uses the MP4 micro rail terminals (4mm)

Weidmuller terminals are the TS15 Micro Terminal Type AKZ.

Production information and catalogue numbers are provided on our website – www.rteckpacific.com (See the specifications fact sheets on the tool bar).
